| with local, regional or national programmes or strategies for environment protection? 3 - 0 points - the project can be partly included in local, regional and national programmes or strategies for environment protection; 3 - 0 points - the project is insignificantly related to local, regional and national programmes or strategies for environment protection. 15 points - the project is insignificantly related to local, regional and national programmes or strategies for environment protection. 15 points - the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | 2. To what extent is the project consistent | | | |
| programmes or strategies for environment protection? 3 - 0 points - the project is insignificantly related to local, regional and national programmes or strategies for environment protection. 15 points - the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | _ ~ | 8 - 4 points – the project can be partly included in local, | 10 | |
| 3 - 0 points - the project is insignificantly related to local, regional and national programmes or strategies for environment protection. 15 points - the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | programmes or strategies for environment | | 10 | |
| regional and national programmes or strategies for environment protection. 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | | environment protection; | | |
| regional and national programmes or strategies for environment protection. 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | | 3 - 0 points - the project is insignificantly related to local | | |
| environment protection. 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border environmental initiatives: Initiatives also as regards cross-border environment protection. 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border environmental initiatives: 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regards cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regards cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: 15 | | | | |
| 3. To what extent does the project affect nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border environmental initiatives: 15 points – the project will contribute in a clear and direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | | | | |
| 3. To what extent does the project affect nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border environmental initiatives: You had extent does the project affect way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | | | | |
| nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border improving ecological coherence of Natura 2000 sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | 3. To what extent does the project affect | 1 1 | | |
| functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact) by implementing at least one of the following objectives: - improving ecological coherence of Natura 2000 | | | | |
| geographic focus areas(for projects regards cross-border impact)regards cross-border impact)by implementing at least one of the following objectives:initiatives also as regards cross-border- improving ecological coherence of Natura 2000 | | | | |
| regarding cross-border environmental the following objectives: initiatives also as regards cross-border - improving ecological coherence of Natura 2000 | | | 15 | |
| | | | | |
| | initiatives also as regards cross-border | - improving ecological coherence of Natura 2000 | | |
| 1100 of the process areas, | impact)? | network and of other protected areas; | | |
| - enhancing monitoring of biodiversity (incl. | | - | | |

| inventory); - propagation of knowledge and raising awareness related to protecting naturally valuable areas; - supporting sustainable tourism on protected areas; - supporting/intensification of actions of the administration and pro-ecological non-governmental organisations aiming to protect biodiversity within the Carpathian Convention; - multifunctional development of naturally valuable areas; - propagation of knowledge and raising ecological awareness of officials, especially as regards 'green' work places and 'green procurement and purchases'; - intensification of actions of the administration and pro-ecological non-governmental organisations that are conducive to protection of the natural environment; - increasing the volume of 'green' products made in Poland; - propagation of knowledge and raising ecological awareness of the society, especially administrative staff as regards building pro-ecological attitudes (via trainings, workshops, seminars and e-learning platforms); - building correct ecological attitudes of children and youth; - creating and popularisation of partnerships between administration and proecological non-government organisations; |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| administration and proecological non-government organisations; - enhancing the operating effectiveness of institutions from the public administration sector as regards environment protection laws; |
| - implementation of appropriate management as |

regards habitat and species protection;

- intensification of protective measures aimed at assuring suitable habitat conditions for endangered fauna species;
- restoration and preservation of endangered habitats;
- popularisation of appropriate management as regards habitat and species protection on protected areas, including NATURA 2000;
- intensification of cross-border cooperation and enhancing effectiveness and complexity of protective measures executed by administrative authorities and pro-ecological non-governmental organisations;
- more effective cooperation between neighbouring countries with respect to nature protection, especially on NATURA 2000 areas,
- better protection of naturally valuable areas.
- 14-8 points the project will contribute in a direct way to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact), but it has been presented in an overly generalised way;
- 7-2 points the project will partly contribute to nature protection and ecosystem functioning in a sustainable way on geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact), which is to be achieved by implementing one of the above mentioned objectives;
- **1 0** point the project has little impact on nature protection and ecosystem functioning in a sustainable way on

| | geographic focus areas (for projects regarding cross-border environmental initiatives also as regards cross-border impact). 5 - 4 points – the project is fully complimentary with the provisions of the NDP / NSRF; | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|--|
| 4. To what extent is the project complimentary with provisions of the National Development Plan/ National Strategic Reference Framework? | 3 - 1 points – the project is partially complimentary with provisions of the NDP / NSRF; a part of its measures overlap with the EU funds; | 5 | |
| | 0 points – the project is not complimentary with provisions of the NDP / NSRF; its measures overlap with the EU funds. | | |
| | 5 points – the project implements at least one horizontal policy (apart from sustainable development in the environmental aspect); | | |
| 5. To what extent does the project affect the implementation of horizontal policies (sustainable development, equal opportunities for both genders and for persons with disabilities)? | 4—1 points – impact of the project on implementation of horizontal policies (apart from sustainable development in the environmental aspect) has been formulated on less or more general level; | 5 | |
| | 0 points — apart from sustainable development in the environmental aspect the project implements horizontal policies in an insufficient way. | | |
| total | | 50 | |

| II. Project management /implementation | | | | | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|----|--|--|--|--|--|
| 1. What is the Executing Agency's 10 points – the Executing Agency has gained vast experience | | | | | | | |
| experience in management/implementation in management/implementation of projects/ programmes of projects /programmes within the scope having a similar scope in the past 5 years; | | 10 | | | | | |
| that corresponds to the subject of the | | | | | | | |

| project in question? | 9 - 2 points – the Executing Agency has general experience in | | |
|------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|
| | management/implementation of projects/ programmes having | | |
| | a similar scope; | | |
| | 1 - 0 points - the Executing Agency has little/no experience in management/implementation of projects/ programmes having a similar scope. | | |
| Does the project management system assure its effective implementation | effectiveness of project implementation cases on the | | |
| pursuant to SPCP requirements, and in | institutional potential which is not fully satisfactory to allow project implementation; it plans outsourcing a part of works under the project to subcontractors, which has not been clearly justified in the application and gives rise to concerns as whether it is indeed indispensable to allow appropriate project implementation; | 5 | |
| | 1 - 0 points – there are serious doubts as to whether the proposed management system would assure effective project implementation; the Executing Agency has little institutional potential for project implementation; in addition, it has insufficient specialised staff for project implementation and does not plan commissioning a part of works under the project to subcontractors. | | |

| 3. Does the project Executing Agency have financial stability? ¹ | 10 - 9 points – the Executing Agency has financial stability; 8 - 1 points – the Executing Agency does not have full financial stability; 0 points – there are serious doubts as regards financial stability of the Executing Agency in the context of possible project implementation. | 10 | |

| | regards the rationability of the action plan. | | |
|-------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|
| 3. To what extent is the action plan clear and feasible? ³ | 5 points - the action plan is feasible and clear; 4-1 points - there are doubts as to the feasibility of the action plan; 0 points - feasibility of the action plan is highly questionable. | 5 | |
| defined (are these the groups that need biggest support under the project)? To what extent does the project contribute | 5 points – potential beneficiaries/target groups have been identified correctly and clearly. The project is highly conducive for satisfying needs of the above mentioned groups, and benefits for the target groups arising from its implementation are indisputable; 4 - 1 points – potential beneficiaries/target groups are indicated in a generalised way. The project is only partly conducive for satisfying their needs or this contribution is questionable; | 5 | |
| 5. To what extent does the project contain objectively verifiable and achievable indicators for the assumed measures? 4 | 5 points – the indicators have been defined precisely and are measurable, and the sources of their verification have been clearly indicated and allow an objective evaluation; 4 - 1 points – formulation of the indicators enables their general evaluation, however, they are presented too broadly, imprecisely or the value of the indicators is inadequate for the specific nature of the project; | 5 | |

³ This item shall not be taken into account in evaluation of the Project Outline ⁴ This item shall not be taken into account in evaluation of the Project Outline

| 0 points – the indicators are not adequate for the project description or for activities undertaken under it. | 25 | |

| | | |

| IV. Budget/ financing and cost effectiveness | | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|----|--|
| 1. Is the expenditure included in the project eligible, consistent with the programme documents, in particular Paragraph 5.5 of the Framework Agreement? | documents and principles. The project contains small non- | 15 | |
| 2. Is the project cost effective? Are estimated costs commensurate with/ proportionate to the expected results? In case the project includes small investment measures (up to 30% of eligible costs), do they constitute necessary element of the project and are strictly related to non-investment activities? | | 5 | |

| | that they are strictly related to non-investment activities (that they serve realization of the latter); • points – the inputs are disproportionate to the planned effects, particular measures assumed in the project lack interrelations. There are serious doubts as regards the fact if investment measures are necessary for the project implementation and/or that they are strictly related to non- | | |
|--------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|
| | investment activities. | | |
| regards implementation of activities assumed under the project? Do costs | 5 points – expenditures presented in the budget are rational and correspond to market prices; 4 - 1 points – expenditures have been estimated in an overly general way; no specific indication has been made for the expenditure level for certain measures, which impedes verification of its conformity to market prices; 0 points – expenditures in the project budget are irrational (fail to correspond to market prices) or have not been defined precisely. | 5 | |
| 4. Has the budget been presented in detail and clearly? ⁶ | 5 points – expenditure has been defined in a logical and detailed way, allowing execution of an unequivocal evaluation of the financial feasibility of the project; 4 - 1 points – the project budget gives rise to concerns as regards the particularisation and transparency of particular items; 0 points – it is not possible to carry out an unequivocal evaluation of the project financial feasibility, because expenditures have not been defined in a sufficiently clear, logical and detailed way. | 5 | |
